

Vittangi Mine Permit Update

Talga Group Ltd (“**Talga**” or “**the Company**”) (**ASX:TLG**) provides an update on the permitting of the Company’s Nunasvaara South graphite mine in northern Sweden, the source of natural graphite for Talga’s green Li-ion battery anode production (Vittangi Anode Project).

The environmental and Natura 2000 permit was granted by the Swedish Land and Environment Court earlier this year (ASX:TLG 6 April 2023) with the Court of Appeal deciding not to grant leave to try appeals that were subsequently submitted (ASX:TLG 1 September 2023). In accordance with statutory process, the rejected parties could appeal the Court of Appeal’s decision to the Supreme Court by the 28 September 2023.

The Company has been made aware that there have been appeals submitted by prior appellants. The submission period is now closed with the Court of Appeal expected to forward the submissions to the Supreme Court.

The Supreme Court is expected to determine whether to reject or grant any party leave to appeal once a review process has been completed. The Supreme Court may only hear an appeal if there is a need to develop case law or there are special grounds such as a miscarriage of justice or gross error in law.

Authorised for release by the Board of Directors of Talga Group Ltd.
