

Investor Fact Sheet

Name	Talga Group Ltd
Business Description	<p>Talga Group Ltd is a fully integrated producer of lithium-ion battery materials, technologies and industrial graphene additives.</p> <p>Talga is building a natural graphite anode facility in Sweden running on 100% renewable electricity, to produce ultra-low emission coated active anode for greener lithium-ion batteries.</p> <p>Customer tests confirm the high performance of Talga's products, and qualification processes with battery manufacturers and automotive OEMs are underway.</p> <p>Talga owns multiple high grade graphite projects in northern Sweden, including the Vittangi graphite project – one of the world's highest grade and Europe's largest JORC-compliant resource. These are advantageously located near fast growing battery gigafactories, and benefit from established high quality infrastructure including renewable electricity, road, rail and ports.</p> <p>Talga also owns cobalt-copper-gold, iron ore and prospective lithium deposits in Sweden, which are intended to be commercialised to provide funds for the core battery and advanced material developments.</p>
