Talga Resources Limited ("Talga" or the Company") is pleased to announce that it has received \$1.7million in funds as part of a placement to professional and sophisticated investors via the issue of 20 million ordinary shares at 8.5 cents per ordinary share ("Placement").

11,519,991 shares were issued pursuant to the Company's 15% capacity under ASX Listing Rule 7.1 and 8,480,009 shares were issued pursuant to the Company's 10% capacity under ASX Listing Rule 7.1A.

The Company annexures an Appendix 3B and provides the following information required under ASX Listing Rule 3.10.5A:

- a) The dilutive effect of the issue of the shares is 19%.
- b) The Company issued the 8,480,009 shares under Listing Rule 7.1A as it believes this is the most efficient mechanism for raising funds to meet its stated objectives and the Placement was considered the most appropriate of the opportunities that were considered by the Board.
- c) The Placement was offered to a range of professional and sophisticated investors and accordingly, there was no need for an underwriter.
- d) Broker fees incurred in connection with the Placement were \$102,000. There were no other costs associated with the Placement other than regulatory and compliance costs.

Managing Director's Comment

"The Company is now fully funded to complete metallurgical and other tests that will result in a dual graphite/graphene preliminary economic study of the Nunasvaara graphite project in northern Sweden. The Placement attracted encouraging support from major shareholders including Yandal Investments Pty Ltd, a company controlled by prominent prospector Mark Creasy plus new shareholders with significant interest in the graphite space."
